Interactive Kiosk + TSP100III Thermal Printers

Streamline in-store experiences through engaging digital touchpoints and seamless printing

Deploy enhanced consumer experiences throughout brick-and-mortar retail with seamless printing capabilities on tablet-based displays. Star Micronics' proven line of thermal printers and Aila's iPad-based Interactive Kiosk with TrueScan technology are now compatible, enabling engaging, efficient, high-value use cases from point-of-entry to point-of-sale.

Aila's sleek, secure Interactive Kiosk for iPad and iPad Pro is available with a variety of mounting options. A newly designed custom floor stand for the Interactive Kiosk integrates Star Micronics' TSP100III series of thermal printers, enabling turnkey deployment of one-touch printing through an engaging tablet-based touchpoint in any brick-and-mortar environment. The Interactive Kiosk includes Aila's TrueScan™ technology, which adds powerful optical scanning capabilities to the iPad's native camera. The Interactive Kiosk is also compatible with companion payment terminals for complete point-of-sale functionality.

Versatile customer-facing touchpoints

POINT OF SALE

Leverage the versatility of Aila's Interactive Kiosk to provide seamless payments and the option to print or email receipts.

ENHANCED PRICE CHECKING

Enable in-asile barcode scanning, product discovery, recommendations, and more. Print tickets, coupons, and receipts with barcodes that can be scanned at checkout.

CUSTOM ORDERING KIOSK

Eliminate lines at the supermarket deli or any other counter-based system with self-service ordering and one-touch printing of receipts or order tickets.

Aila + Star Micronics solutions leverage the power of iOS, the iPad's responsive touchscreen, and Aila's TrueScan technology to combine optical scanning, printing, and on-screen interactions

Aila's Interactive Kiosk is a standout touchpoint solution that combines intuitive usability and beautiful versatility to deliver endlessly adaptable, amazingly powerful customer experiences throughout the store.

Aila's TrueScan technology, the signature scanning technology in Aila's hardware products provides lightning fast, accurate 1D/2D barcode scanning. A machine-learning algorithm continuously improves scanning performance, while software configurability future-proofs barcoding.

Star Micronics' TSP100III series is Star's best-selling thermal printer, using futurePRNT software to provide easy setup and print customization. The TSP100III is the faster, easier, and better POS printing solution. Already a leading player in the mPOS market, Star Micronics' TSP100III is offered with WLAN, LAN, Bluetooth, or USB interface connectivity, for an easy-to-use and ready-to-go installation.

ABOUT AILA

Aila Technologies delivers seamless experiences for enterprises, uniting real-world and online operations to empower employees, streamline workflows and delight customers at every touchpoint. Through Aila's TrueScan software and suite of Interactive Kiosks and Mobile Imagers that beautifully combine proven iOS capabilities with superior integrated scanning, Aila enables front-end applications that create brand new possibilities in-store and beyond.
